ALLEGED CASE OF CJD IN TEENAGER: PRESS ARTICLES 25 JANUARY

My minute earlier today, on the press coverage given to the reported discussion between a doctor from the CJD Surveillance Unit in Edinburgh and the relative of the ill teenage girl, refers.

As we discussed, a general line could be added, if pressed, to the line you have already received, as follows:

"We are confident that no-one from the CJD Surveillance Unit would discuss with any patient's relatives matters relating to BSE or to contact with the press".....(and consider adding "in the way that has been reported."
